Cum Laude Information Technology graduate from Bicol University with a strong foundation in data organization and process automation. Familiar with using Python, PHP, and VBA to streamline workflows and improve data processing efficiency. Experienced in visualizing Customer Journey Flows and designing system diagrams to translate complex operational data into clear, actionable insights.

AREAS OF EXPERTISE

- Front-End & UI/UX: Knowledgeable in HTML, CSS, JavaScript, Bootstrap, and Figma.
- UX Strategy: Experienced in Customer Journey Mapping and Responsive Design.
- Data & Automation: Experienced in VBA Excel automation and familiar with R and Tableau for data visualization.
- Programming: Familiar with Python, PHP, and MySQL
- Knowledgeable in basic troubleshooting, system testing, and digital process improvement.

KEY ACHIEVEMENTS

- **Academic Excellence.** Graduated Cum Laude in Bachelor of Science in Information Technology and consistently earned Dean's List honors across multiple semesters.
- **Front-End & UI/UX Development.** Designed and developed a production-ready web application using PHP, JavaScript, and MySQL, featuring responsive dashboards and Figma-based UI.
- **Process Automation.** Built Excel VBA automation tools that improved data processing efficiency and accuracy during internship operations.
- **System Design.** Designed and developed an internal company website to improve information accessibility.
- **Workflow Optimization.** Created Customer Journey Flows, system flowcharts, and process diagrams to support business improvement.

WORK EXPERIENCE

IT Intern (On-the-Job Training)

Feb 2025 – May 2025

One Tagaytay Place Vacation Club, Inc., Pasig City

- Developed Excel automation tools using VBA, which improved data processing efficiency and accuracy for internal reports.
- Designed and built an internal company website focused on improving information accessibility and user navigation using HTML, CSS, and JavaScript
- Developed Customer Journey Flows and video animations to visualize service workflows and enhance user engagement.
- Assisted in system analysis and technical troubleshooting to resolve digital process bottlenecks and improve stability.

ACADEMIC PROJECTS

AgTech Web Application – Capstone Project (UI/UX Designer & Front-End Developer)

- Developed the client-side interface using HTML, CSS, and JavaScript with Bootstrap for mobile responsiveness.
- Designed and implemented OTP-based authentication, dashboards, and CRUD modules.
- Designed responsive UI using reusable CSS frameworks
- Integrated PHP, JavaScript, and MySQL for backend functionality
- Project Video & Tutorial: [Watch on YouTube](#)
